It no longer builds difference.

*Aldi owns Britain's trust in prices* **BUT**

not in emotions. Customers rarely feel seen by the brand. Budget shopping has been treated as purely transactional – for both Aldi and its competitors.

Aldi has proven warmth sells at Christmas. It's never let that warmth live anywhere else – no personalization, no loyalty relationship, no everyday brand voice that carries the same heart.

Aldi already demonstrates care through its community initiatives and seasonal campaigns. The problem isn't a lack of warmth. It's that customers rarely experience it during everyday shopping.

**THE WARMTH EXISTS.**

**IT'S JUST INSTITUTIONALLY QUARANTINED AWAY  
FROM THE SHOPPING EXPERIENCE ITSELF.**

*STRATEGIC OPPORTUNITY*

People are proud of being smart with money. But they are embarrassed to look and to be made to look like they are struggling. Comparing prices, planning meals and sticking to a carefully planned shopping list aren't signs of deprivation. They are habits that reflect their discipline and responsibility.

# PEOPLE

**DON'T BUDGET BECAUSE THEY WANT TO.**

**THEY BUDGET BECAUSE THEY**

# CARE

Every decision at the shelf is really a decision about someone else. A child's school trip. Rent next week. A family dinner. People aren't looking for sympathy. They want their effort to be recognised.

Aldi has spent years proving prices. Now it has the opportunity to recognise the care behind those choices.

## COMPETITIVE LANDSCAPE

Every major supermarket owns a functional promise. Better quality. More choice. Better rewards. Faster delivery. Few own an emotional one.

**ALDI CAN MAKE VALUE FEEL LIKE CARE.**

# EVERY DAY

ALDI HAS THE OPPORTUNITY TO OWN THE EMOTIONAL SIDE OF BUDGETING BY MAKING EVERY INTERACTION FEEL THOUGHTFUL, USEFUL AND HUMAN.

## *Build Relationships, Not Transactions*

Show up before, during and after every shop.

## *Make Everyday Decisions Feel Meaningful*

Recognise the care behind customers' choices, not just the money they save.

## *Use Data to Reduce Mental Load*

Use personalisation to simplify planning and celebrate progress, never to encourage unnecessary spending.

# SUPERMARKET THAT TREATS SAVING MONEY LIKE CARE, NOT COMPROMISE

*We help every saving  
count.*

-BRAND PROMISE

Aldi earns trust through consistently low prices without compromising quality. Its efficient operating model lets customers spend less, so they can spend more on what matters.

*-Reasons to Believe*

*THE BIG IDEA*

**Care isn't  
measured by  
what you  
spend.**

EVERY LIST. EVERY CHOICE. EVERY SMALL NO.  
ALL LEADING TO THE YES THAT MATTERS.

**It's  
measured by  
what you make  
possible.**

# THE APP

A planning companion, not another loyalty programme.

The Aldi app helps customers organise life before they shop, turning budgeting into something that feels simpler, calmer and more rewarding.

Key experiences

- Meal planning
- Shared family shopping lists
- Savings milestones
- Budget tracking

# INSTORE

Make the store feel as caring as the advertising.

The store becomes Aldi's loudest expression of care.

Every sign stops talking about prices and starts recognising the people making difficult choices.

Example:

“Planning ahead looks good on you.”

*instead of “Low Prices”*

# RECEIPT

Every receipt becomes a reminder of what today's savings make possible.

A receipt shouldn't end the shopping journey. It should remind customers what today's savings make possible.

Example:

£18.32 saved today.

One step closer to the school trip

1.

The hardest part of budgeting isn't spending less. It's deciding what each sacrifice is protecting.

2.

She compares. She considers. She chooses carefully. Because every choice is about more than today.

3.

Little messages. In the right places. Not loud. Not pushy. Just a quiet reminder that she's doing something right.

5.

Because of today, she can say yes to tomorrow. To the moments that matter most. That's what care makes possible.

4.

It's more than a total. It's a reminder of what today's choices make possible. Her effort is seen. Her care is recognised.

# CARE, *Not Compromise*

PEOPLE DON'T BUDGET BECAUSE THEY WANT TO.

THEY BUDGET BECAUSE THEY CARE.

WHEN A BRAND RECOGNISES THAT...

EVERY RECEIPT BECOMES ENCOURAGEMENT.

EVERY STORE BECOMES REASSURANCE.

EVERY SHOPPING TRIP BECOMES A REMINDER THAT SMALL CHOICES MAKE BIGGER MOMENTS  
POSSIBLE.

THAT'S HOW ALDI MOVES BEYOND BEING BRITAIN'S SMARTEST SUPERMARKET.

AND BECOMES BRITAIN'S MOST UNDERSTANDING ONE.
